Contact Wikk for custom short specs or budgetary and design assistance.

To ensure competitive bidding by qualified Sub Contractors, please specify Wikk's products in CSI Divisions: 8, 14, or 28.

Features & Benefits

Competitive 4-week lead time

Ships from the factory to the job site in 20 business days or less.

Stable in-ground installation

Bottom of bollard is embedded in foundation during groundwork phase for a strong and immovable anchoring.

Weather-resistant cap secured with stainless steel set screws

Easy removal of leak-free mortised black marine board cap to access internal wiring. Cap material is resistant to fading or cracking in all environments.

Prep for one device

Includes cutout for mounting an actuator or other device. Prep is customizable to fit make/model specified for device.

Robust structure

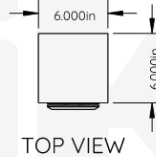

Solid and reliable aluminum construction for both indoor and outdoor locations.

Long-lasting powder coat finish

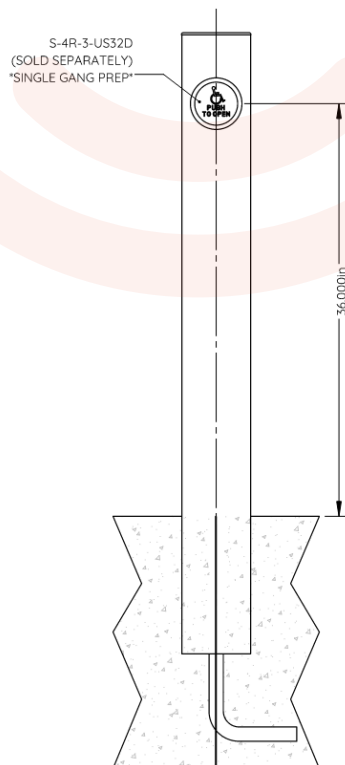

Sleek and attractive powder coat finish with excellent corrosion and chemical resistance. Choose from a wide selection of colors to match any palette.

Wireless operation (Optional)

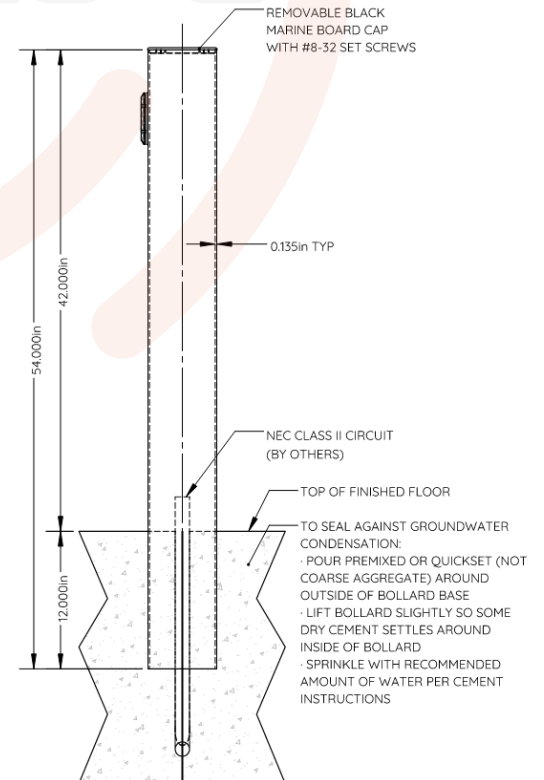

Transmitter & battery secured directly under the removable cap for optimal transmission signal and convenient maintenance.
